

Æ — the ligature, rebuilt as a grid.

Aether owns a letter almost nobody uses: Æ. One glyph, unmistakable, already the brand's name — no diamonds, no chevrons, no glow. Drawn from a five-part grid: two diagonals, three bars. The middle bar is the only coloured element, so the mark works in one ink, in metal, embossed on a card, or at 16 pixels.

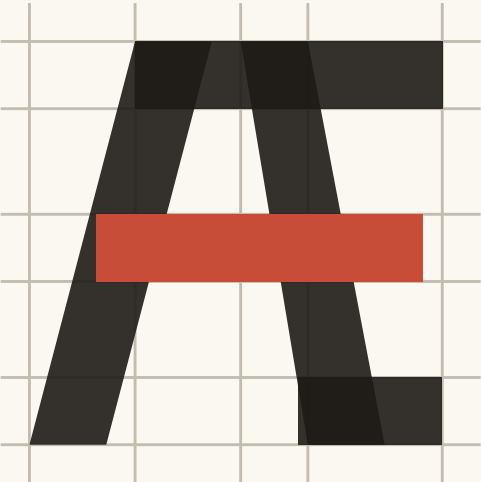

ink •
oklch(0.22
0.01 60)

bone •
oklch(0.95
0.012 85)

signal •
oklch(0.58
0.16 32)

CONSTRUCTION

bar height = 14u • stem 16u
diagonals share one apex bar
